Summit County Protects Lives and Property with Emergency Notification System

Summit County Emergency Management Agency has a new Emergency Notification System to communicate important information before, during and after an emergency.

This system will send an emergency notification to a specific area or countywide.

The Summit County Emergency Notification System will allow individuals to receive emergency notifications across multiple communication devices—including cell phone, home phone, email, text messaging, fax and pager.

To ensure that individuals receive time-sensitive, life-saving emergency information residents and businesses may sign up and register at <http://www.co.summit.oh.us/index.htm>. If you have a phone number listed in the white pages this number has been preloaded to the system and does not need to be registered.

Residents and businesses can manage their system profile online by controlling contact methods such as cell phone, home phone, email, text messaging, pager and PDA. They can also add other addresses of interest to their profile, e.g., a parent or loved one that may require assistance during an emergency.

Information entered into the system will be kept strictly confidential and will not be provided to any vendor or third party organization.
